

Epic

Smart Epilating System

2 Year Warranty

Smart RF technology incorporating precision computer control.
This guarantees faster response time, extreme accuracy, and precise timing.

DUAL MODALITIES WITHIN ONE UNIT

1. High frequency-low intensity – manual timing (Low-level Shortwave)
2. High frequency-high intensity – automatic timing (Flash)

Low Intensity RF Features:

- Manual adjustment capability for customized treatments.
- Pulse modality for added comfort.
- Presets for different hair types.
- Footswitch controlled.
- Audio feedback (soft tone) for operator settings and timing functions..

High intensity RF Flash features:

- Flash modality features adjustable pulse widths for best results. Uses a combination of wide and narrow pulses to assure faster epilations with maximum client comfort.
- Manual pulse adjustment for customized treatments.
- Presets for different hair types.
- Footswitch activated. Automatic treatment timing is based on selected setting.

Clareblend Inc. is an ISO13485 certified and FDA registered manufacturer.
All Clareblend equipment is designed and manufactured in USA at our Reno, Nevada facility.
